## Acronym Database

Acronym Database is a small Windows application designed specifically for helping you search for acronyms in a large database. The advantages of being portable Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to search for acronyms on the breeze, without having to go through installation steps. User-friendly layout You are welcomed by a clean feature lineup that provides quick access to several important acronym categories, such as Acronym Database, Acronym Search, Facebook Emoticons, Country Code, Currency Code, and File Extension. The tool implements an intuitive behavior, integrates all dedicated parameters into a single layout, and provides a seamless navigation mode. Search operations Acronym Database gives you the possibility to simply type in the acronym in the primary panel, enable or disable the real-time search mode, pick the search method (exact, anagram, related, or containing text), make the application reveal acronyms containing a user-defined length, and view information about each abbreviation. What's more, if you do not find an acronym into the database, the tool lets you launch search operations via your web browser and pick from several preset websites. The program allows you to check out lists with Facebook emoticons, country code, currency code, as well as file extensions. You can copy the selected information to the clipboard, so you can easily paste data into other third-party programs. The last option gives you the freedom to sort the file extensions by several preset categories, such as Application, Audio, Development, Data, Document, Font, Graphic, Malware, Multimedia, Video, and others. Plus, you can check out detailed information about each file extension by accessing different websites. Performance Tests have shown that Acronym Database carries out the search process very quickly and without errors. It doesn't eat up a lot of CPU and memory, so the overall performance of the computer is not affected. Bottom line To sum things up, Acronym Database proves to be a reliable application worth having on your computer for performing quick search operations in a large database.
