Officers were called to the scene at a trailer park on Lewis Avenue near Marion Boulevard just after midnight.

Advertisement A complainant told police a woman allowed her fiance to use her apartment as a way to meet women. The suspect, Darion Reed, had been staying there for a week, according to the police report. When Reed arrived at the apartment, the woman told him to leave. That's when Reed put a gun to the woman's head and forced his way into the apartment, according to police. The victim's roommate grabbed a gun of her own and pointed it at the suspect. Reed left the apartment, but was later captured by police. He was charged with first degree burglary, and was booked into the Oktibbeha County Jail. of metallic elements which is suitable for the formation of a desirable metallic pattern. Furthermore, the patterned film includes several advantages of the metallic element selected as a conductor according to the process. For example, the patterned film can be made conductive or semi-conductive according to the film thickness and the coating condition of the conductor, and the conductor can be removed by etching or the like with moderate etching conditions, thereby forming a metallic pattern with low damage to the underlying substrate. To accomplish the above objects, a method for producing a conductive film of the present invention includes the steps of coating a metallic element on a substrate to form a metallic precursor film having an electric conductivity of at least 10 S/m; and drying and/or curing the metallic precursor film. A method for producing a conductive film of the present invention includes the steps of coating a metallic element on a substrate to form a metallic precursor film having an electric conductivity of at least 10 S/m; and thermally oxidizing the metallic precursor film. In the above methods, the metallic element used for forming a conductive film is preferably selected from the group consisting of copper, silver, gold, aluminum, magnesium, a rare earth metal and a metallic alloy or mixture thereof, and the conductive film preferably comprises at least one metallic element selected from the group consisting of silver, copper and
