The authors reviewed 565 brain tumors in 553 patients in order to clarify the prognosis of asymptomatic primary brain tumors with a follow-up period of more than 5 years. The tumors included 33 glioblastomas, 20 metastatic tumors, and 10 low-grade gliomas. Five years after surgery, the disease-specific survival rate was 75%, and the

progression-free survival rate was 43%. The cumulative 5-year survival rate of glioblastomas was 20%. Progressive disease was not seen after surgery in any patient.

I will just mention the definitions below, which I have seen on various GR sites. Let (x,y,z) be a vector of 3-dimensional space. x is the perpendicular distance from the origin to (x,y,z) . y is the parallel displacement to the xy plane. z is the perpendicular distance from the xy plane to the origin. (u,v) are the orthonormal coordinates of the xy plane Let us define a new coordinate system (x',y',z') in a similar way by rotating it along z axis by an angle a : $(x',y',z') = (x \cos(a), y \sin(a), z \cos(a))$. Question 1: What is the importance of this

coordinate system (x',y',z') over (x,y,z) ? If I have a vector in the coordinate system (x,y,z) and rotate it in the system (x',y',z') , wouldn't the same vector remain the same? Why do we need to study this coordinate system? Question 2: Let us take the vector $(1,0,0)$. What is the value of x',y',z' ? $(x',y',z') = (0, 0, 1)$ $(x',y',z') = (0, 0, -1)$ $(x',y',z') = (-1, 0, 0)$ $(x',y',z') = ($

Import feedback from printed paper or PDFs and add changes to your drawings automatically, without additional drawing steps. (video: 1:15 min.) Improved Markup Assist: Markup Assist recognizes the new ellipse function. Markup Assist recognizes the new ellipse function. 4D objects are easier to see in drawings. 3D views and object properties take on four dimensions. Interactive 3D views show the four dimensions for dimensioning, measurement, and drawing points. Shape styles, strokes, and other drawing components can be moved to the center of a drawing as new views. Drawing properties are saved and restored when navigating through a drawing. Projects can be organized in views and subviews. Multi-CAD, Sender, Visio, and other apps can be launched and managed from the drawing window. How can you help us make AutoCAD even better?
