• Scaling art and animation • Smooth, easy gameplay • 40+ levels • 3 end bosses • 3 robots, 100+ items • 8 unique playstyles • Amazing music by Jarek Isaakowski • HDR support on Windows and Mac Use your smart powers to defeat enemies, clear blocks in your way or interact with switches that are otherwise out of your reach. Move special magnetic objects to open new paths or protect yourself through clever positioning. Freeze time and plan ahead to defeat multiple enemies at once or reach distant platforms. About This Game: Welcome to Grater, a well-designed and fun

platformer, with two great twists: 1. Open, modern style with dynamic, shifting images and catchy music 2. You can't pause the game. So you have to be careful where you move, because you can't save the game. Every move counts. As hard as it may be, you have to jump from platform to platform, and collect objects in your way while dodging dangers and baddies. Face 4 types of enemies that follow different paths to reach you. If they don't eat you when you're on fire, you've got a real problem. You can use an acid, an electric current, a cold spell, or a special magnetic object to defeat your enemies. Each has its own special ability and a life bar that you have to watch your back to refill with every jump. There's even a block you can use to block danger, but it can't stay in place for too long, so you have to time it just

---

right. In most levels there are pressure pads that'll clear the path for you, but they're not always easy to find and you need to take care to turn them on with your laser, which burns through everything but the pads. The first two levels are divided into several parts, so you can always see where to go next. Although it gets harder on later levels, and you'll need to collect even more power ups. Move fast and jump right, and you'll be fine. About This Game: Welcome to Grater, a well-designed and fun platformer, with two great twists: 1. ## **What's new in Gates To Terra II:**

**Gates to Terra II is an action role-playing game for the Xbox 360, developed and published by Eidos Interactive for Windows release. Besides being the sequel to Gates to Terra, this game is set after the events of the game and serves as a prequel that explains many things going on in the Kingdom of Terra. The story is set several years after the events of Gates to Terra, focusing on new characters like the manipulative and ambitious Hengist, the courageous and youthful Jasper and the mischievous Illeka, they encounter something sinister and ancient reaching the height of its power. The artwork for the game was created by German artist Chris Seavor, the game's characters are all based upon his own design with some "adapted for use" in-game but overall modeled after the Tarot.**

**Gameplay** The player starts the game in the portal that must be opened with the spear of Damocles. Once it is opened, the player can explore a certain amount of areas called districts, named after the first district of the game Gates to Terra I. Garamscar is the key town of Terra which houses the portal to the areas, where allies and enemies are present. The player controls a character with eight classes which can be changed during the course of the game. Each class has a certain set of feats, skills, powers, abilities, indicators and a set of opportunities all influence of each other from the class, including inside the dungeons. The player can switch characters at any time, but they cannot switch from the party to their party, except in certain places. The items and weapons can be found on the ground, in chests, in gears, in machines or

---

**in enemies' bodies. Items will either give the player the specified bonus (like the longsword in the citadel to be used against the fifth boss) or some bonus like free healing, potions, arrows, etc. In the game, ten main towns are present, together with several minor ones. Other than Garamscar, each one is dynamically changing over the course of the game, one where a war is being fought or another side is done well. The player can also sell various kind of goods, steal, recover items during the course of the game and can accomplish missions. The jobs (mainly) are assigned by the people of the town, some wants to sell food (like apples), others to fight a monster or find a traitor and sometimes the player has to work like a mailman that will deliver**
