I'm using traktor, it's an e-09. is it possible to get effects like the zebra to work for each system of the rig. I just got a gig with fm8 and i didn't know i would have this problem. my amp's effects page and some of the effects in tkcs are missing. i tried to update via the internet with no luck. i've tried to search google for any solutions, but i got nothing. this is the patch. it should bring up all of the effects. right now only the how to record amp setting is working. i've created a new disk with the patch. anyone have any suggestions? A: I'm not completely sure what you mean by the 'zebra' effect. It's just an effect that shows you the instruments spectrum in the visualizer, but it only works for the primary audio monitor. It doesn't affect the multitrack, which is controlled by the FX channel. The remote control you use should have a dedicated FX channel - this is usually where the effects are. There is no separate 'Zebra' plugin, it's just an effect that has been coded into the VST. 105 F.3d 665 NOTICE: Eighth Circuit Rule 28A(k) governs citation of unpublished opinions and provides that they are not precedent and generally should not be cited unless relevant to establishing the doctrines of res judicata, collateral estoppel, the law of the case, or if the opinion has persuasive value on a material issue and no published opinion would serve as well. Submitted Jan. 11, 1997.Filed Jan. 16, 1997. Before BEAM, HANSEN, and MORRIS SHEPPARD ARNOLD, Circuit Judges. PER CURIAM. 1 Cheryl A. Anderson appeals the district court's1 dismissal of her complaint alleging discrimination in employment by the Social Security Administration. After a careful review of the record and the parties' briefs, we conclude that the district court correctly decided that Anderson failed to file her complaint within the applicable limitations period, and thus the complaint was time-barred by 42 U.S.
